Background & Objectives

The Pharmaceuticals User Software Exchange (PhUSE) Computational Science Standard Analyses and Code Sharing Working Group leverages industry-regulatory collaboration to:

- Establish and maintain a publicly available repository for storing program code to be used as analytical tools for medical research
- Where gaps exist, develop recommendations for analyses and displays in areas that could benefit from crowd-sourcing
- Where gaps exist, develop code for recommended analyses and displays (to reside in the repository)

White Papers Overview

- Recommended analyses and displays for individual studies and integrated summaries
- Sample SAP language
- Discussion on analytical and statistical topics such as:
  - P-values and confidence intervals
  - Events occurring after study drug discontinuation
  - Alternative methods when percentages are biased

For White Papers:
1. Go to www.phuse.eu
2. Click on Working Groups
3. See CSS Deliverables

For Scripts:
1. Go to www.phusewiki.org
2. Click on CSS Working Groups
3. See Standard Analyses and Code Sharing

For White Papers:
1. Safety Topics of Interest
2. Labs
3. General Output Tips & Considerations

For Scripts:
1. Hepatotoxicity
2. Questionnaires
3. Vital Signs

Recent Activities

Safety Analytics Workshop
Highlight tables, figures, and listings that facilitate review
Interactive Visuals
Identify areas where interactive visuals can be leveraged
Displays that identify labs requiring further investigation
Which ones get the message across the best?
Which ones are easiest to understand?

Getting Involved
1. Use the final white papers
2. Include links to the white papers in SAPs
3. Review upcoming white papers
4. Raise Awareness

Participate!
See www.phusewiki.org for projects. Sign up for a project: workinggroups@phuse.eu Contact any project lead
