Subteam: Adaptive Program, Oncology
Co-Chairs: Olga Marchenko & Tom Parke

Subteam Objectives

- To come up with better treatment development strategy in oncology
- To evaluate a possible improvement of Phase II and Phase III clinical trial designs
- To simulate and compare adaptive strategy with standard approaches
- To illustrate advantages of program simulation.

Subteam Deliverables

- A manuscript “Improving Oncology Clinical Program by Use of Innovative Designs and Comparing Them via Simulations” was published in the TIRS September issue of 2013;
- A manuscript “Advances in Oncology Drug Development” was published in the TIRS special issue in January of 2014;
- Currently working on the paper which will be an extension of the first paper: adding sequential designs with 2 and 5 IAs to Phase III development and using model-based enrollment strategy. The tentative deadline to complete & submit the paper is Q4 of 2015 (the latest in January, 2016).
